Technology Solutions that Drive Productivity

AT-NET is the one trusted partner for all your technology needs.
We do **IT** right the first time and provide customers with excellent value.

Inc.
5000

Company Overview

Founded in 1999, AT-NET Services has grown into the premier technology integration firm in the Southeast. With a consultative, “solutions-focused” approach, best-of-breed vendors, and the industry’s most talented sales and engineering force, AT-NET offers comprehensive engineering services for the life cycle of your systems; *assess, design, build, secure & manage.*

Clients choose AT-NET because:

- We are the best in our field
- We employ smart people who are passionate about their careers
- We staff only dedicated career employees
- We have built a reputation as responsive, capable, & accessible
- We strive to have a valuable partnership with our customers

Even with our success, AT-NET never forgot the fact that IT isn’t really about technology, it’s about people. We strive to deliver the best service available and are sincerely determined to outperform your expectations. Give us a try & experience smart people solving your technology problems.

- Supply of Hardware, Software, & Labor for One Monthly Fee
- Customer Assistance Center available 24x7x365
- CAC addresses customer questions, troubleshoots hardware and software problems, performs surveys, & takes parts orders

Ben Rogers - Carolina Neurosurgery & Spine Assoc.

“I wanted to take the time to let you know how valued your organization is to ours... I feel we have a powerhouse team for our network vendor”.

Richard Barnette - Shelco

“AT-NET did great work in understanding our goals for implementation and coordinating resources to complete the project in a way that exceeded our expectations by finishing on time and on budget.”

Richard Haberkern - Telespial Systems

“Thank you very much for helping my company on its path to success. Your timely and courteous response to our technical issues has helped us a great deal, especially during tough economic times.”

Bob Bruner - Ballantyne Village

“We had to get a group like AT-NET to help us manage all this because doing it through individual companies never gave us the overall coordination we needed. In addition to the cost savings, it gave us good relief to know that there was one group we could call, with one phone number, a group we know personally, where they can solve any of our problems.”

Donna Martin - Nucor Steel Tuscaloosa, Inc.

“I just wanted to let you know what a great job Randy did when he came to our site last week for our Exchange upgrade. He really showed his professionalism and knowledge and was great at solving any unforeseen issues that arose. I would welcome him to our plant anytime! Thanks for the great job. It made the upgrade seamless and was one of the easiest upgrades we have ever done.”

Kevin Pak -Hampton County

“In short, AT-NET has provided a great solution for me and has helped me a great deal the past few years. It’s easier to deal with one vendor than dealing with many because of finger pointing. Especially when it comes to large projects.”

We Do *IT* Right the First Time and Provide Customers with Excellent Value.

Solutions Provide Business Benefits

Application Development

- Provide custom business & mobile applications that automate critical processes
- Improve efficiency, manage resources, and provide insight into business analytics

Collaboration

- Enable your team to communicate in unprecedented ways regardless of physical location
- Eliminate distance as an obstacle to productivity while reducing costs

Data Center Virtualization

- Large reductions in both capital and operating expenditures by shifting focus to efficiency & innovation
- Disaster Recovery and business continuity planning

Infrastructure & Security

- Plan, design, and implement customized solutions for structured voice, video, and data cabling infrastructure for both indoor & outdoor applications
- Provide advanced IP based security & surveillance to secure your most important assets

Managed Services

- Put the focus of your IT back on driving your business by reducing costs and providing cost transparency & predictability
- Improve business agility, smooth migrations to future technologies, reduce risk & provide a consistent high level of service

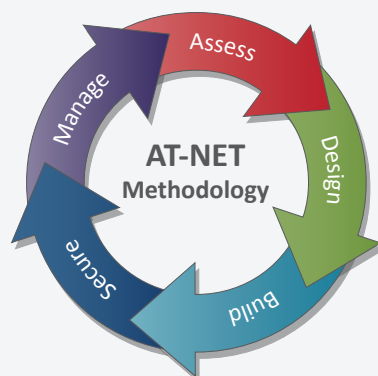

Network Infrastructure

- Intelligent network, endpoint, and user services provide the flexibility, speed, & scale to support new devices, applications, and deployment models
- Provide highly secure and reliable access to any person or any technology resource from any location on any device

Unified Facilities

- Turn real estate into environments that are personalized, efficient, functional, & highly profitable
- A convergence of technology and real estate that provide new sources of revenue

Methodology

Our proven methodology allows us to recommend, with confidence, the proper technologies and products to reduce costs, grow revenue, improve efficiency and mitigate risks.

- Assess - Discover Strengths & Vulnerabilities
- Design - Create & Plan Strategies
- Build - Construct Intuitive Solutions
- Secure - Protect Valuable Data & Assets
- Manage - Complete Systems Support
