

Data Center Virtualization

Simplify your IT infrastructure with a dynamic and flexible datacenter complete with server and datacenter virtualization solutions. AT-NET's virtualization solutions deliver large ROIs by transforming the focus from maintenance to efficiency & innovation. Virtualization helps you reduce capital expenses through server consolidation and improve operating expenses through automation, while minimizing lost revenue by reducing both planned and unplanned downtime. Our solutions can be integrated with your overall IT infrastructure and existing management tools. AT-NET ensures continued IT innovation by enabling solutions from the desktop to the Data Center, utilizing existing IT investments, allowing you to connect anytime, anywhere.

Capabilities

- Virtual Desktop & Servers
- Data Center; Design, Build, Manage
- Real Time Backups & Disaster Recovery
- Unified Fabric & Computing
- Storage Area Networks

Disaster Recovery

Minimize the impact of software or hardware failure, power interruptions, and facilities damage, while maximizing your ability to deliver services to clients. AT-NET's Disaster Recovery solution provides rapid cutover to a redundant system in the event of an interruption to digital services. Our disaster recovery platform facilitates effective coordination of recovery tasks, reduces the complexity of the recovery effort, and helps you quickly reestablish normal business operations. Some key features include:

- Automated synchronization of database and key files
- Backup system that acts as a hot standby system
- Automated failover from Primary system to Standby system without equipment changes
- Automated database and key file backup
