

Infrastructure & Security

AT-NET Services' Infrastructure and Security division is the premier Structured Cabling and Physical Security provider in the Southeast. This division has been created to help customers plan, design, and implement IP based Security and Building Management Systems. Our solution provides advanced IP based security and surveillance to protect and secure your most important assets.

We can now offer our customers solutions that cover the complete range of the OSI model including structured voice, video, and data cabling infrastructures for both indoor and outdoor applications.

Capabilities

- BICSI Certified Installers/Technicians throughout our many offices
- RCDDs on staff who provide Project Design & Management
- Licensed, Unrestricted, Low Voltage Contractors
- Full Service premise and outside plant cabling implementations
- Full service Physical Security division offering CCTV, Intrusion Detection, Video Surveillance, Access Control and much more
- Complete Fire and Burglar Alarm Installation and Monitoring
- IDS, IPS, Network & Client Security
- Personnel and Asset Tracking
- Biometric Technologies including SmartCards

Cabling Services

AT-NET Services offers verification and testing services of your existing copper and fiber plant. If you are planning a new install of high tech applications, such as VOIP, it is recommended that you verify and test the capabilities of the existing cable plant. Upgrading to new high tech products can be an exciting time for your business, so don't let a sub-standard Structured Cabling System limit your capabilities.

- Cat-5 & Cat-6
- Multimode & Single Mode Fiber Optic Links

Our testing includes all interconnect hardware, fiber panels, & patch cords.

Richard Haberkern - Telespial Systems

"Thank you very much for helping my company on its path to success. Your timely and courteous response to our technical issues has helped us a great deal, especially during tough economic times."

AT-NET Services

Founded in 1999, AT-NET Services has grown into the premier risk management and technology integration firm of the Southeast. With a consultative, "solutions-focused" approach, best-of-breed vendors, and the industry's most talented sales & engineering force, AT-NET Services offers complete engineering services for the life cycle of your system; design, build, secure and manage.
