

Network Infrastructure

AT-NET specializes in providing highly secure and reliable access to any person or technology resource, from any location on any device. Our solution is designed for network efficiency & productivity as well as for long term growth and performance. By being able to provide a wide spectrum of services, AT-NET can build network systems that span your organization from network access to the cloud.

Intelligent network, endpoint, and user services provide the flexibility, speed, and scale to support new devices, applications, and deployment models. We allow organizations to connect anytime, anywhere, with any device - in a secure, dependable, and seamless fashion, providing true freedom from boundaries.

Capabilities

- Routing & Switching
- Mobility
- Security including: AntiX, Intrusion, & Firewall
- LAN, WAN, & VPN
- Network Management
- Wireless and Remote Access
- Carrier & ISP Services
- Alarms & Notifications

Core Platform

The tremendous IP traffic growth is fueled by new media applications and customer demand for more interactivity, personalization, mobility, and video. Our solutions let you deliver personalized, next-generation services and media experiences anytime, anywhere, with any device.

AT-NET's Network Infrastructure helps enable end-to-end scale, resiliency, and efficiency so you can deliver services on one infrastructure. Our solutions provide a multiservice convergence platform so you can serve all of your customers with a single network infrastructure. We can also help lower capital and operating costs, reduce time to market, & capture new revenue opportunities.

A proper network infrastructure is the key to your entire IP network.

Donna Martin - Nucor Steel Tuscaloosa

"I just wanted to let you know what a great job Randy did when he came to our site last week for our exchange upgrade. He really showed his professionalism and knowledge and was great at solving any unforeseen issues that arose. I would welcome him to our plant anytime! Thanks for the great job. It made the upgrade seamless and was one of the easiest upgrades we have ever done."

AT-NET Services

Founded in 1999, AT-NET Services has grown into the premier risk management and technology integration firm of the Southeast. With a consultative, "solutions-focused" approach, best-of-breed vendors, and the industry's most talented sales & engineering force, AT-NET Services offers complete engineering services for the life cycle of your system; design, build, secure and manage.
